London, July 2. Mr Winston Churchill clashed with debate was carried on and Socialists in the House of Commons today future discussions contain over an after-dinner speech of Korea made the same sort of construct last night by his Defence Minister, Lord Alexander.

After the speech, newspapers were asked not to publish one passage, which was revealed today as — "I should be very much happier if General Van Fleet (8th Army Commander in Korea) had a little more reserve in his own hands" (General Alexander meant reserve strength behind the front lines).

The speech, which caused a political explosion today, was made to 500 guests at a Canada Club dinner only an hour or so after Lord Alexander had made a statement to the House of Lords on his recent Korea visit.

He said he had spotted one weakness which he did not like to tell the Lords. Someone shouted "Why not?" and Lord Alexander replied "Because it is a thing I was asked not to mention as a matter of secrecy."

The United States Air Force announced today the production of a new almost automatic' jet' fighter plane, the "Starfire," which, its makers claim, can "spot the enemy miles away, look on to the target, track, close, aim and open fire all by it-

The announcement by the Air torce and its inducts, the rockheed Aircraft Corporation, said the 'F-94-C Starffre, equipped with radar and armed with rockets, was an all-weather jet interceptor designed for United States air desence "to outsmart and outshoot enemy bembers."

The plane's top speed is "over 600 miles an hour," according to Mr Hall Hubbard, the Lockheed company's chief engineer. It was one of the world's. "fastest climbing jet planes in according to bombing invasion lines of over 45,000 feet."

Lockneed company described the Starffre as "a fighter plane without guns." It is armed instead with 24 airto-air rockets housed ground the nose. It can carry additional rockets on the wings.

"The main duties of the Starfire's pilot and radar operator are to take the plane off the ground, manoeuvre to the general target area guided by, ground radar, switch on the 'electronic crew' at the proper time, monitor the operation of the piloting and rocket control apparatus during the attack and then land."

The Westinghouse Company said its automatic pilot, one of the innovations in the plane, was "an electrical co-pilot . which guides the plane through loops. rolls and other 'combat' manneuvres with split-second accuracy."-Reuter.

Constitutional Reform Plan For Tunisia To Be Discussed With

The French Resident-General, M. Jean de Hautecloque, will discuss with the Bey of Tunis, Sidi Lamine Bey, on July 10 the final draft of France's proposed constitutional reforms for Tunisia.

The French Counsellor Gonoral to the Tunisian Government, M. Pierre de Bacque, answering Tunisia n criticisms that the proposed reforms. were not enough, said today that the programme was a great step forward.

The French Government, he said, was resolved on progressive enlightened developments in Tunisla without hesitation, but by steps, not leaps.

M. de Bacque said that under The American vieweis that if the proposed reforms the M. SUPPERS EISENHOWER CHICAGO WEETING

Taft Gets All Senator Seats From Georgia

Chicago, July 2.

The Republican Party's National Committee stunned the Eisenhower camp here today by voting that all 17 seats for Georgia at the Republican National Convention opening next week would go to supporters of Senator Robert Taft.

Political observers immediately classed this as by far the greatest win for Senator Taft and setback for General Eisenhower in this week's battle over the organisation of the National Convention.

It establishes beyond a doubt that Senator Taft, at least for the present, is running the show. It also means a net gain of at least 18 Convention votes for Senator Taft. Reliable experts estimate that this gives Senator Taft 489 delegates to General Eisenhower's 410.

Drain On Reserves Checked BRITISH GOLD POSITION

London, July 2. The Chancellor of the Exchequer, Mr Richard A. Butler, announced in the House of Commons today that Britain's gold dollar reserves fell \$15,000,000 in the last three

This compared with a loss of \$636,000,000 in the first quarter of this year.

On June 30 the reserves stood 'at \$1,085,000,000; compared with 61.700,000,000 un March 81. Mr Butler said that it was too early to give a detailed analysis of the reasons for this considerable improvement but among the factors was the receipt of \$202,000,000 in defence aid from the United States.

Mr Butler said that the nation had begun to see the effect on her dollar imports of the cuts she had been forced to make and also the effect of action taken by other members of the Sterling Area following the Commonwealth Finance Ministers' meeting.

THE FACTS

The fall in imports had not involved a reduction in the total quantity of stocks of essential foods and raw, materials. Mr Hugh Dalton, former Labour Chancellor of Exchequer, asked whether it was not true that Belgium and Germany were getting the gold

I Have Never Been More Serious About Any Fight

So I'm now the British and Empire Lightheavyweight Champion as well! I know that I've got to give up either my old titles or my new ones-according to the rules I can't keep both-but it's a wonderful feeling just the same.

It's because the public has always been so good to me that . I don't like saying anything that sounds like a complaint. But it's got to be done in the interests of the game itself. It's this:

Several times during the fight Don Cockell or myself took half a second off to apologise for an accidental blow or to touch gloves after slipping. Now and again, too, we had a grin at each other. In the eighth round the referee called us together, just after Don had said "Sorry" for a punch that slipped way down a bit, and warned us to get more serious about our work.

The scientists, all men with extensive experience in testing degree of drunkenness, are giving evidence before a B.M.A. committee which is studying the effects of alcohol on motorists.

They are urging the introduction of legislation for the acceptance of a standard blood alcoholic content to determine the "incapability of the driver having proper control over his vehicle. Most favour the naura of 0.15 alcohol in the blood as the maximum content. Over that figure all motorists would be regarded as unfit to drive. This percentage equals three pints of beer of average strength or about five small whishles.

Washington, July 2. A \$2,400,080,000 lag in foreign aid outlays helped hold the U.S. budget desicit for fiscal 1952 to \$4,016,640,878.10 — less than half of President Truman's January forecast.

Analysis of year-end figures announced by the Treasury late yesterday showed that spending on military and economic aid for other countries in the Mutual Security Programme came to only \$4,500,000,000 of a budgeted \$6,900,000,000.

Outlays for the U. S. Military Services ran almost \$900,000,000 short of the budgeted \$139,000,000,-000 making the accord biggest contribution toward holding total spending \$4,700,000,000 below the President's estimate of last January.

The Life They Loved

ROM girlhood, Gwynneth has known exactly what she meant to do in life.

Her father is a farmer, and she spent all her early years on the farm. But the land held no special attraction for her. As soon as she was old enough to do so, as soon as her schooling was over, that is, she left the country for the town and began the career she had planned for so long. She became a student nurse at a hospital in a

provincial city. Gwynneth loved the work. She was entirely absorbed by it, and this being so she naturally did it well.

At the hospital she had a friend, another nurse who was us totally under the spell of the work as Gwynneth was herself. As usually happens when two young people share an interest in their work and make their work their life, the friendship developed until it became, after the job of nursing, the most important thing in the lives of each of them.

FINE lives of the two girls A followed parallel courses. They sat for and passed the required examinations together; together they survived the tyranny of sisters and matrons, endured the role of strop for young doctors to sharpen their wits upon, put up with the poor pay, poor food and long hours the authorities seem to consider so essential to the training of a nurse. They passed at last from the apprentice stage in their profession, and moved to a

Tsiang Accuses Reds Of Causing Germ Epidemics ESCAPED COMMUNIST'S REVELATIONS

United Nations, July 2. The Nationalist Chinese delegate, Dr T. F Tsiang, said today that he had private information that epidemics in China had resulted from Communist germ weapon experiments that swept out of control.

Dr Tsiang told the United Nations Security Council that the experiments allegedly were conducted in Manchuria by captured Japanese scientists working with Russian and Chinese experts.

He said his information came from a former Communist, who escaped from the Yalu River area, and was of the "greatest importance." He added that he had no way of checking it, but it was certainly "worth looking

66 Ancient Made In Claim Supreme Court SOUGHT

Believed to be the second case since 1893 on "ancient lights", the hearing opened before Mr Justice Williams at the Supreme Court this morning on a claim for a perpetual injunction restraining the Local Printing Press, Limited, from erecting a six-storey building in Duddell Street.

In the case in 1893 the theory of ancient lights was discussed but no decision was handed down as the matter was settled out of Court. It was heard before Mr Justice Fielding Clarke.
